

Services Page - Full Content Package

PAGE OVERVIEW

Source: resources/views/front/services/index.blade.php. This page has six sections: Hero, Services Grid, Roadmap/Process, Testimonials, CTA, and FAQ + Contact. Roadmap and Testimonials subtitles were already written for this page in earlier passes (public/content/services/process.pdf and public/content/services/testimonials.pdf) and are referenced, not repeated, below. This document covers the remaining sections in full: Hero, Services Grid, CTA, and FAQ.

Code-level finding that corrects an earlier assumption: reading this file directly shows the roadmap step titles and descriptions hardcoded here ("Planning & UI/UX Design," "Development & Quality Assurance," "Launch, Growth & Continuous Support") are NOT identical to the fallback steps seen on Home and About. Each page's blade file carries its own hardcoded default steps. This is fine as-is - independent fallback content per page is a reasonable pattern - but it corrects the earlier assumption that the four steps must be byte-identical everywhere. No fix needed here.

Code-level finding on the CTA paragraph: the description paragraph flagged as "duplicated" on the About page CTA section is not a copy-paste editing mistake - it is a single hardcoded PHP fallback string, written directly into the blade template (visible at the bottom of the CTA section here, using config('constants.BUSINESS.name')), that renders identically on any page until real, page-specific content is entered in the CMS admin for that page's cta-section. That distinction matters: the fix is not "someone forgot to edit this paragraph," it's "no one has entered admin content for this section on this page yet, so the shared code fallback is showing." Services-specific replacement text is provided below.

SECTION 1: HERO

Purpose: Simple orientation banner - tells the visitor which page they landed on and how to get back, nothing more.

Target Audience: Anyone arriving at the Services page, from a nav click or a direct search result.

User Intent: "Confirm I am in the right place."

SEO Opportunity: The H2 "Our Services" is the only text here besides the breadcrumb - a short one-line subtitle would give search engines (and visitors landing from Google) one more sentence of context above the fold, but this is a nice-to-have, not a fix, since no subtitle field currently exists in the code for this hero.

Main Heading: Our Services (keep as-is)

Optional Subtitle (not currently wired in code - would need a small template change to add):

Websites, software, and everything that keeps them running, built around what your business actually needs.

Hinglish - Heading already simple aur kaam ka hai, change ki zaroorat nahi. Optional subtitle sirf ek suggestion hai agar future mein hero ke neeche ek line add karne ka scope bane - abhi code mein woh field hi nahi hai, isliye yeh sirf ek recommendation hai, koi missing content bug nahi.

SECTION 2: SERVICES GRID ("What We Offer")

Purpose: The main navigation hub of the page - helps a visitor who does not yet know exactly which service they need find the right starting point.

Target Audience: Visitors who know they need help but have not narrowed down whether that means a website, custom software, an app, or something else.

User Intent: "Which of these is actually what I need?"

Business Goal: Route the visitor into the right service detail page as quickly as possible, without them having to guess.

SEO Opportunity: Each service card links to its own detail page (`front.services.details`) - the real SEO work happens there. This section's job is internal navigation and should stay short.

Code Note: Each service card currently renders two identical "Explore More" buttons pointing to the same URL - one directly under the service title (line 68-70) and a second one under the short description (line 78-80). This looks like a leftover from template iteration rather than an intentional double-CTA and is worth a quick check on whether both are needed.

Main Heading: What We Offer (keep as-is)

Subtitle: Pick a starting point below, or tell us what you're trying to solve and we'll point you to the right one.

Card Button Text: Explore More (keep as-is - clear, standard, no change needed to the wording itself)

Hinglish - Subtitle isliye likha gaya kyunki abhi is section ka koi intro line nahi hai, sirf heading hai. Yeh line un logon ko directly address karti hai jo abhi decide nahi kar paye ki unhe kaunsi service chahiye - "tell us what you're trying to solve" ek low-pressure alternative deta hai unke liye jo list scan nahi karna chahte. Duplicate 'Explore More' button ek code-level cheez hai, content issue nahi, isliye sirf note kiya gaya hai.

SECTION 3: ROADMAP / PROCESS (reference only - already completed)

This section was fully covered in an earlier pass - see `public/content/services/process.pdf` for the Section Analysis, subtitle, and step content already written for this page. No changes needed here beyond what that file already covers. The only new information from reading the

code directly is the step-content finding noted in the Page Overview above.

SECTION 4: TESTIMONIALS (reference only - already completed)

This section was also fully covered earlier - see [public/content/services/testimonials.pdf](#). Reading the code confirms the testimonials themselves come from a single shared \$testimonials collection with no per-page override, which confirms the earlier recommendation to reuse the same 30-testimonial pool across Home, About, and Services was correct - there genuinely is one shared data source, not several.

SECTION 5: CTA ("Let's Build Something Exceptional")

Purpose: The closing conversion push for a visitor who has browsed the services grid and read the process and testimonials - the natural point to ask for the next step.

Target Audience: Visitors who now understand what Deovate World offers and how the company works, and are deciding whether to reach out.

User Intent: "I have seen what is offered - what do I actually do next?"

Business Goal: Convert Services-page browsing into a project enquiry.

Content Note: As explained in the Page Overview, the description paragraph here is a shared code-level fallback (also containing the Test Project bug via BUSINESS.name, and the recurring "secure, scalable, and high-performing" phrase). The content below is written specifically to replace that fallback with Services-page-appropriate text once entered into the CMS admin for this page.

Main Heading: Let's Build Something Exceptional (keep as-is - shared heading, correct to keep consistent)

Subtitle: Whichever service brought you here, let's talk about what it actually takes to get it built.

Description: You've looked through what we offer - now the real question is which of it actually fits your business. Tell us what you're trying to build, and we'll walk you through which service (or combination of a few) gets you there, along with a straightforward look at cost and timeline before you commit to anything.

Button Text: Start Your Project (keep as-is)

Hinglish - Subtitle aur description dono specifically Services page ke context ko address karte hain - "whichever service brought you here" directly acknowledge karta hai ki visitor ne already grid dekha hai. Description mein "which service (or combination of a few)" jaisi line honest hai, kyunki bahut clients ek se zyada service chahte hain aur unhe khud pata nahi hota ki kya-kya milakar chahiye. Yeh generic "partner with our experienced team" wali boilerplate line se kaafi zyada specific aur useful hai.

SECTION 6: FAQ & CONTACT

Purpose: Same objection-handling plus lead-capture pairing already reviewed on Home and About, here scoped to whichever FAQ category applies to the Services context.

Target Audience: Visitors close to reaching out, with a couple of questions left before they will fill out the contact form.

Content Note: Both the FAQ tablet and the Contact tablet status bars display config('constants.BRAND_NAME') directly - the sixteenth and seventeenth appearance of the same Test Project placeholder traced earlier in this review to config/constants.php. No new information, same fix applies.

Main Heading: Frequently Asked Questions (keep as-is - shared heading)

Subtitle: Answers to what people usually ask before choosing a service.

FAQ Content: Pulled dynamically from the active FAQ category for this context (\$category->activeFaqs) rather than the ten general questions written for the Home page - the specific questions and answers should reflect whichever service category this section is actually tied to, and were not fabricated here since inventing them without knowing the real category would risk being inaccurate rather than helpful.

Contact Form Panel: Identical fields, placeholders, and validation messages to the Home and About versions - correct to keep as-is, this content is page-agnostic.

Hinglish - Subtitle "before choosing a service" specifically Services page ka context capture karta hai, generic "process, pricing, and services" wali Home page line se alag. FAQ content jaan-boojh kar generate nahi kiya gaya kyunki yeh category-specific hai - bina real category jaane fake FAQs likhna misleading ho sakta tha, isliye sirf approach explain ki gayi hai.

QUALITY CHECK

Human sounding, SEO optimized, Easy to read, Premium tone, Brand consistent, Conversion focused, No keyword stuffing, Natural flow, Grammarly ready, No content duplicated verbatim from Home/About CTA versions.
