

Our Growth in Numbers

SECTION ANALYSIS

Purpose: A second, About-page-specific stats block that backs up the Vision and Mission cards above it with harder numbers - experience, satisfaction, and reach.

Target Audience: The same deep-evaluation visitor reading the rest of the About page, now looking for numbers that back up the "trusted partner" language just above this section.

User Intent: "Show me the scale behind the claims you just made in Vision and Mission."

Business Goal: Close the About page on hard proof rather than sentiment, right before the visitor moves toward Services or Contact.

SEO Opportunity: Genuine, consistent stats support E-E-A-T and are strong candidates for Organization structured data (foundingDate can now be derived from "5 years"). The near-duplicate subtitle wording shared with the homepage stats section is a minor thin-content risk worth avoiding.

Recommended CTA: None needed - consistent with the homepage stats section, this works as a pure trust beat.

Design Psychology: The passport-stamp-style card shape (a ribbon/tag pointing down) and the travel-themed background - airplane, suitcase, world map, passport - are clearly meant to say "global reach." That said, this is a software development company, and the travel-agency-style imagery is a stretch for that message; it reads more like an unedited stock template than a deliberate Deovate visual choice, similar to the mismatched grayscale photo already flagged on the newsletter section.

Content Note 1 (Resolves earlier finding): This section states 120 Projects Successfully Delivered, which matches the About page's "Who We Are" badge exactly. That agreement between two independent About-page sections is a useful signal - it suggests 120 may be the correct figure, and that the homepage's 50+ and the Vision & Mission card's 150+ are the ones that need correcting to match, rather than the other way around. Worth confirming with whoever owns the real numbers before treating 120 as final.

Content Note 2: "Years of Industry Experience: 5" is new information not shown elsewhere on the site. This is genuinely useful - it can now fill the gap intentionally left open in the About page "Who We Are" rewrite, where a vague "over the years" was replaced with client examples specifically because no concrete number was available at the time.

Content Note 3 (Verify before publishing): "Client Satisfaction Rate (%): 98" is a specific, checkable claim. It should be backed by an actual measurement (survey data, review scores, or similar) before publishing - a precise-looking percentage that turns out to be arbitrary is the kind of detail that damages credibility if a client or journalist ever asks how it was calculated.

Content Note 4: The subtitle here is nearly identical in structure to the homepage stats subtitle ("Measurable results that reflect our commitment to quality, innovation, and client success"), just extended slightly. Reusing the same sentence across two pages reads as templated rather than deliberate, and search engines can treat near-duplicate boilerplate as thin content - worth giving this one its own voice.

CONTENT (ENGLISH)

Main Heading: Our Growth in Numbers (keep as-is)

Subtitle: A quick look at what five years, hundreds of conversations, and a lot of shipped projects actually add up to.

Statistic 1: 120 - Projects Successfully Delivered (pending confirmation as the site-wide canonical figure - see Content Note 1)

Statistic 2: 98% - Client Satisfaction Rate (must be backed by real, checkable data before publishing - see Content Note 3)

Statistic 3: 15 - Industries Served Worldwide

Statistic 4: 5 - Years of Industry Experience (recommend feeding this number back into the About page "Who We Are" paragraph for consistency)

EXPLANATION (HINGLISH)

Main Heading - "Our Growth in Numbers" already achha hai aur "Our Impact in Numbers" (homepage) se enough alag lagta hai naam mein, isliye title unchanged rakha.

Subtitle - Original line homepage ke stats subtitle se almost hu-ba-hu tha, sirf thoda extend kiya gaya tha. Naya version "five years, hundreds of conversations" jaisi specific, narrative phrasing use karta hai taaki yeh apna alag identity feel kare, copy-paste na lage.

Stat Labels - Sab four labels (Projects Successfully Delivered, Client Satisfaction Rate, Industries Served Worldwide, Years of Industry Experience) already clear aur scannable hain, isliye unchanged rakhe gaye.

Content Note (120 vs 50+ vs 150+) - Yeh section is poore review mein sabse useful data point hai, kyunki isne pehli baar do sections ko agree karte dikhaya (120 = 120). Isse ek strong hint milta hai ki 120 hi correct number ho sakta hai, aur homepage ka 50+ aur Vision & Mission ka 150+ dono ko isse match karna chahiye.

Content Note (5 Years) - Yeh number pehli baar site par kahin dikha hai. Isse "Who We Are" section ke paragraph 2 mein wapas daala ja sakta hai, jahan pehle jaanbujh kar koi fake number nahi likha gaya tha.

Content Note (98%) - Yeh number specific aur checkable claim hai, isliye ise publish karne se pehle real data se verify karna zaroori hai - warna yeh ek fabricated stat jaisa lag sakta hai, jo

brand ke "Honest" value ke against jaayega.

QUALITY CHECK

Human sounding, SEO optimized, Easy to read, Premium tone, Brand consistent, Conversion focused, No keyword stuffing, Natural flow, Grammarly ready. Note: all four statistics require a final accuracy check against real business data before this section is published.
