

Our Services

SECTION ANALYSIS

Purpose: The section right after the intro that turns "we build digital things" into a scannable list of what a visitor can actually hire you for.

Target Audience: Business owners who already know the specific thing they need — a website, a piece of software, an online store — and are checking if you offer it.

User Intent: Do they do the one thing I actually came here for, or do I need to keep looking.

Business Goal: Get the visitor to click into the one service card that matches their need, instead of reading a wall of text about the company in general.

SEO Opportunity: Natural entity coverage of the core service categories — web design, custom software, eCommerce, SEO — each with its own "Explore More" link into a dedicated service page.

Recommended CTA: Explore More (per card, already in the template).

Design Psychology: A card grid lets visitors self-select in seconds instead of reading paragraphs to figure out if you're relevant to them.

Template Note: This section currently renders only a Title and Subtitle (via *section_titles.json* → *home.services*). It is not a full dynamic section like About or Achievements, so there is no wired-in Small Label slot yet. The label below is included for consistency and is ready to use the moment that field is added to the template.

CONTENT (ENGLISH)

Small Label (not yet wired — see Template Note): What We Do

Main Heading: Our Services

Subtitle: Websites, software, and marketing built as one connected system — not three disconnected vendors passing the blame when something breaks.

EXPLANATION (HINGLISH)

Small Label — "What We Do" isliye rakha kyunki yeh simple aur direct hai, attention heading se nahi khinchta, sirf context set karta hai.

Main Heading — "Our Services" already brand aur navigation ke saath consistent hai, isliye change nahi kiya — naya heading sirf isliye badalna generic feel dega.

Subtitle — Yeh line ek real pain point pe based hai: jab client apni website, marketing, aur software teen alag agencies se karwata hai, toh kuch break hone par koi bhi ownership nahi leta, sab ek-dusre pe blame daal dete hain. Yeh specific, relatable claim hai — generic "we provide quality services" wali line se bachata hai jo har agency ki website pe likhi hoti hai.

Why not a "30 years of experience" style claim — Site ke apne counters (50+ Projects, 35+ Clients) ek growing agency dikhate hain, ek 30-saal purani firm nahi. Fake experience ka number daalna trust todega jis din koi visitor "About" page padhega — isliye copy ki quality premium/senior-copywriter level rakhi gayi hai, lekin koi jhoothi history claim nahi ki gayi.

QUALITY CHECK

Human sounding, SEO optimized, Easy to read, Premium tone, Brand consistent, Conversion focused, No keyword stuffing, Natural flow, Zero AI/GPT-sounding phrasing, No fabricated stats, Grammarly ready.
