

Frequently Asked Questions & Contact (About Page)

SECTION ANALYSIS

Purpose: The exact same FAQ-plus-contact-form pairing already reviewed on the homepage, reused here as the About page's own objection-handling and lead-capture close.

Finding: Unlike every other reused section reviewed so far (Development Process, CTA, Testimonials), which each had at least one page-specific difference - a different subtitle, or an intentionally identical structure with only the FAQ list needing to be shared - this instance shows zero differences from the homepage version. Heading, subtitle, the single populated FAQ, and the entire contact form are word-for-word identical.

Is that a problem? Partly, and partly not. FAQ and contact form content is reference material, not page-specific marketing copy, so identical FAQ answers and form fields on two pages is normal and expected - a visitor does not need a different explanation of "what services do you provide" depending on which page they're on. The heading and subtitle are a softer case: a visitor who reads both the Home and About pages back to back will notice the exact same sentence twice, which reads as unedited rather than deliberate. That is a smaller issue than the full-paragraph duplication found on the CTA section, but worth a quick pass.

Content Note (Same root cause, now at eleven and twelve instances): Both device frames again show "TEST PROJECT" in their header bar - the same config/constants.php BRAND_NAME and BUSINESS.name issue traced earlier in this review. No new information here, just confirmation that the fix applies here too.

Recommendation: Reuse the same 10 FAQ questions and answers already written for the homepage version of this section (public/content/home/home_faq.pdf) rather than writing a different set - consistency is correct here. The one small change worth making is a slightly different subtitle line for this page, purely so it does not read as an exact repeat to anyone comparing pages.

CONTENT (ENGLISH)

Main Heading: Frequently Asked Questions (keep as-is - shared with homepage)

Subtitle (About page variant): Still have a question after reading about our team and process? Here are the ones people ask most.

FAQ Panel Content: Reuse the same 10 questions and answers already written for the homepage FAQ panel - no changes needed there.

Contact Form Panel: Reuse the same field labels, placeholders, subtitle, validation message, and button text already written for the homepage version - all of that content is page-agnostic and correct as-is.

EXPLANATION (HINGLISH)

FAQ aur Contact Form Content - Yeh dono reference-type content hain (jaise ek company-wide FAQ list), isliye Home aur About page par same hona normal hai, alag likhne ki zaroorat nahi. Yeh Testimonials jaisa case nahi hai, jahan same fake review do jagah dikhna ajeeb lagta.

Subtitle - Sirf yehi ek chhota change suggest kiya gaya hai, kyunki agar koi visitor Home aur About dono page padhe, to exact same sentence dobara dikhna thoda "unedited" feel de sakta hai. Baaki sab kuch as-is theek hai.

TEST PROJECT Bug - Koi nayi jaankari nahi, sirf confirm hota hai ki yahan bhi wahi config-level fix apply hoga jo pehle trace kiya gaya tha.

QUALITY CHECK

Human sounding, SEO optimized, Easy to read, Premium tone, Brand consistent, Conversion focused, No keyword stuffing, Natural flow, Grammarly ready.
