

What Our Clients Say (About Page)

SECTION ANALYSIS

Purpose: The same client-proof carousel already reviewed on the homepage, placed here to close out the About page narrative on external validation right after Vision, Mission, Numbers, Process, Founder, and Office & Culture, and right before the visitor reaches Contact.

Target Audience: The same late-stage evaluators reading the rest of the About page, now checking whether the culture and team just described actually translate into satisfied clients.

User Intent: "Does everything I just read about this company and its team hold up when a real client describes working with them?"

Business Goal: End the About page on independent validation, immediately before the visitor is likely to reach out.

SEO Opportunity: Same as the homepage instance - genuine testimonials support Review/Testimonial structured data and E-E-A-T. Reusing the same real testimonial pool across Home and About (rather than inventing a second, different set) also avoids the odd impression of two different review sets for the same company.

Recommended CTA: None needed - same reasoning as the homepage version, this section's job is to remove doubt, not to convert directly.

Design Psychology: Identical browser-mockup carousel component to the homepage version, which is the right call for a repeatable UI pattern - consistency here is intentional, similar to the shared Our Development Process component.

Content Note 1 (Two separate bugs, easy to conflate): The mockup tab reads "Test Project/reviews," the same placeholder already traced in an earlier section to config/constants.php's BRAND_NAME and BUSINESS.name values. That fix will resolve the tab label. It will not, however, fix the testimonial quote itself - "asdasdasdfafsd," attributed to "Anky Singh Humraj, Web Developer, Creative Room Inc." - which appears to be a separate, seeded test row sitting in the testimonials database table (likely managed through the Testimonial module referenced in the app's module list). That row needs to be deleted or replaced directly through the admin panel; the config fix will not touch it.

Content Note 2: This is very likely the same underlying testimonials data source used on the homepage - the identical placeholder row appearing in both places is strong evidence of one shared table rather than two separately seeded ones. That means the 30 sample testimonials already written for the homepage version of this section should be reused here rather than a new, different set being written - a second, different batch of fictional testimonials would risk looking inconsistent if a visitor compared the two pages.

Content Note 3 (Positive): Unlike the homepage version, the heading here is identical ("What Our Clients Say") but the subtitle is already different from the homepage's longer line - this is

the right instinct and avoids the near-duplicate-subtitle issue flagged on other repeated sections earlier in this review.

CONTENT (ENGLISH)

Main Heading: What Our Clients Say (keep as-is - intentional match with the homepage component)

Subtitle: Businesses we've helped grow, in their own words.

Browser Mockup Tab Label: Deovate World - Client Reviews

Testimonials: Reuse the same 30 sample testimonials already produced for the homepage version of this section (see public/content/home/what-our-clients-say.pdf) rather than authoring a second set. The same disclaimer applies here without modification: these are realistic placeholder testimonials for layout and tone testing only, not real client quotes, and must be replaced with genuine, permission-cleared client feedback before either page is published.

EXPLANATION (HINGLISH)

Main Heading - Home page ke saath match karta hai, jo sahi hai kyunki yeh ek shared component hai, alag-alag heading likhne ki zaroorat nahi.

Subtitle - Yeh already home page ke subtitle se alag hai ("Trusted by businesses we've helped grow" jaisa tha), naya version "in their own words" add karta hai jo specifically testimonial format ko point karta hai - yeh accha instinct tha, duplicate-subtitle issue yahan nahi hai.

Content Note (Do Alag Bugs) - Yeh important hai samajhna: "Test Project/reviews" tab wala bug config file se fix hoga, lekin "asdasdasdfafsd" wala fake testimonial ek alag jagah se aa raha hai - database mein ek seeded test row se. Dono alag jagah fix karne padenge, sirf config change karne se testimonial khud nahi badlega.

Testimonials Reuse - Kyunki dono pages (Home aur About) same fake test row dikha rahe hain, yeh strong sign hai ki dono ek hi database table use kar rahe hain. Isliye naye 30 testimonials likhne ke bajaye, pehle se likhe gaye homepage wale hi yahan reuse karne ka suggestion diya gaya - warna do alag review sets ek hi company ke liye ajeeb lag sakte hain.

QUALITY CHECK

Human sounding, SEO optimized, Easy to read, Premium tone, Brand consistent, Conversion focused, No keyword stuffing, Natural flow, Grammarly ready. Note: testimonial authenticity requirement carries over unchanged from the homepage version of this section.
