

What Our Clients Say

SECTION ANALYSIS

Purpose: Social proof section that lets prospective clients hear the pitch from someone other than Deovate - real testimonials do work that self-description cannot.

Target Audience: Late-stage evaluators who are already convinced Deovate can do the work and are now checking whether other real businesses had a good experience.

User Intent: "Is this what it will actually feel like to work with them" - looking for proof beyond marketing language.

Business Goal: Reduce final-stage hesitation before a visitor submits a project enquiry or picks up the phone.

SEO Opportunity: Genuine testimonials with real names and companies are strong Review or Testimonial structured-data candidates, and can support E-E-A-T signals if attributed honestly.

Recommended CTA: None needed directly in this section - its job is to remove doubt right before the visitor reaches the next CTA section.

Design Psychology: The crown motif and browser-window mockup are consistent with the rest of the site, and the carousel format lets one strong quote get full attention instead of competing with five others on screen at once.

Content Note 1 (Critical): The testimonial quote currently displayed is literally the text "asdasdasdfafsd," with a name, role, and company that all read as placeholder data. This section cannot go live as-is - it needs real client quotes, not filler text.

Content Note 2: The browser mockup tab reads "Test Project/reviews." This is the same placeholder pattern already flagged in the Our Development Process section ("Test Project/process") and the homepage CTA ("Test Project delivers custom websites..."). At this point it looks like a site-wide find-and-replace issue rather than three separate mistakes.

Content Note 3 (Important): Any testimonials published here should be real, attributed with the client's permission, and ideally verifiable. Fabricated reviews presented as genuine client feedback are considered misleading advertising in most markets, including under India's endorsement guidelines, and can also violate Google's review policies if surfaced in search results.

EXPLANATION (HINGLISH)

Heading aur Subtitle - Dono already achhe the, isliye unchanged rakhe gaye - "real feedback from businesses" wali line exactly wahi promise deti hai jo is section se expect ki jaati hai.

In sab 30 testimonials mein jaanbujh kar alag-alag industries (logistics, healthcare, fintech, education, hospitality, manufacturing, legal, agritech, waghera) aur alag-alag countries (India, US, UK, UAE, Australia, Ireland) rakhe gaye hain, kyunki Deovate ka brand khud "Global Clients" ko target karta hai.

Har quote mein ek specific detail hai (jaise "cart abandonment rate," "dispatch time," "no-show rate") - generic "great service, highly recommend" jaisi lines jaan-boojh kar avoid ki gayi hain, kyunki specific detail hamesha zyada real aur believable lagta hai.

Sabse zaroori baat - yeh 30 testimonials sirf layout aur tone test karne ke liye likhe gaye hain. Inhe real client quotes se replace karna zaroori hai, warna yeh fake reviews publish karne jaisa maana jayega, jo advertising guidelines ke against hai.
