

Industries We Serve

SECTION ANALYSIS

Purpose: A dedicated grid proving depth across specific industries, not just general web/software capability — tells the visitor "we've worked with businesses like yours" instead of "we can build anything."

Target Audience: Business owners in a specific vertical — healthcare, real estate, education, e-commerce — who want proof of relevant experience before trusting a generalist agency with their industry's particular rules and workflows.

User Intent: Have you actually built something for a business like mine, or is this generic web-agency copy that fits every visitor equally.

Business Goal: Build vertical-specific trust and funnel the visitor into "Learn More" or "View All Industries" for deeper, industry-specific proof.

SEO Opportunity: Strong — each industry card is effectively an entity signal in its own right (e.g. "healthcare software development"), making this one of the stronger topical-authority sections on the page.

Recommended CTA: Learn More (per card) and View All Industries (once 8+ items exist).

Design Psychology: Vertical-specific framing makes the same underlying service feel custom-fit — "we build healthcare software" reads as more relevant than "we build websites," even when the technical work overlaps heavily.

Template Note: Two things worth flagging for whoever next touches this section, outside the scope of this content document:

1. Each card's "Learn More" link currently points to *href="#"* instead of the industry detail route, unlike the Industries Carousel section further down the page, which correctly links to *front.industries.details*.
2. The homepage has three separate industry-facing blocks in total — this grid, a phone-mockup carousel further down, and a static 4-item strip near the bottom. Worth confirming with the team whether all three are intentional or one is left over from an earlier layout.

CONTENT (ENGLISH)

Small Label (not yet wired — same limitation as earlier sections): Where We've Worked

Main Heading: Industries We Serve

Subtitle: Healthcare, real estate, education, e-commerce — different rules for each, and we've already learned most of them.

EXPLANATION (HINGLISH)

Small Label — "Where We've Worked" isliye chosen kiya kyunki yeh past-experience pe focus karta hai, generic "we support all industries" wale capability-claim se better hai.

Main Heading — "Industries We Serve" retain kiya kyunki yeh is section ke liye standard, clear expectation set karta hai — is phrase ko replace karne ka koi real fayda nahi tha.

Subtitle — Actual industry names (Healthcare, real estate, education, e-commerce) directly mention kiye taaki visitor turant apna vertical spot kar sake — generic "various industries" line se kahin zyada useful hai. "we've already learned most of them" mein jaanbhoojh kar "most" use kiya, "all" nahi — taaki overclaim na lage aur line believable rahe.

Template Note — "Learn More" link abhi href="#" hai, industry detail page se linked nahi — jabki niche wale Industries Carousel section mein sahi route use hota hai. Dev team ke liye flag kiya gaya hai, yeh content doc ka scope nahi hai.

QUALITY CHECK

Human sounding, SEO optimized, Easy to read, Premium tone, Brand consistent, Conversion focused, No keyword stuffing, Natural flow, Zero AI/GPT-sounding phrasing, No fabricated stats, Grammarly ready.
